PanTerra Expands Connectivity Options, Building on End-to-End Security and Application Integration

Addition of cable option expands bandwidth connectivity for highest quality, end-to-end UC solution

SANTA CLARA, Calif. – August 11, 2016 – PanTerra Networks, the leading provider of unified cloud services for mid-market enterprises, today announced the expansion of its SmartBand services to include Time Warner Cable (TWC) 15mb-50mb internet plans. Adding TWC connectivity to PanTerra's broadly available SmartBand offering ensures customers have an even wider footprint and more options than previously available when building a complete cloud-based communications solution. The partnership with TWC further demonstrates PanTerra's commitment to offering its customers ultra-secure and reliable cloud-based solutions, including unified communications, collaborations, contact center, analytics and file sharing services. PanTerra is the first to offer a true end-to-end secure cloud solution with its HIPAA compliant cloud and Multi-Factor Authentication (MFA) for all IP phones and optional MPLS networks. Application integration and interoperability with Office 365, Outlook, Google Apps, Gmail, Dropbox, Box and others, PanTerra's WorldSmart solution can provide the most secure communication solution for your enterprise.

"PanTerra continues to provide its customers and partners the best cloud UC solution in the industry and the addition of Time Warner Cable is a testament to our commitment to delivering the broadest end-to-end solution on the market. Regardless of where you are in the country, PanTerra has a robust and reliable cloud UC and connectivity solution that is comprehensive, secure and covered by the best SLA in the industry." said Arthur Chang, CEO of PanTerra. He continued, "We are offering TWC immediately as an option to enhance our already feature-rich service."

About PanTerra Networks
PanTerra Networks is a business-class Unified Cloud Service Provider, seamlessly delivering multi-media communications, collaborations, contact center, file sync & share and business analytics through its WorldSmart solution. WorldSmart is a HIPAA compliant, highly secure, ultra-reliable, futureproof unified cloud service that can be custom configured on a user by user basis and consistently deployed world-wide.

WorldSmart includes CloudUC, its unified communications service that can upgrade or replace an enterprise's existing communications and collaborations infrastructure with a next-generation cloud-based unified communications service and SmartBox – Enterprise File Sync & Share, its secure cloud file storage, sync & share service with built-in unified communications features.

All WorldSmart services can be self-managed or provided through SentraCloud, its fully managed solution delivered by PanTerra, which includes the management of all WorldSmart services, optional last mile MPLS capable connectivity and any associated on-premises networking equipment.

With PanTerra's Unified Cloud Service solution, enterprises gain the highest levels of security, scalability, reliability, availability, quality of service, service level agreement and support while significantly lowering

their total cost of operations and IT administration complexities. PanTerra is headquartered in Santa Clara, CA.
